CORE STRENGTHS

Product Ownership · Roadmapping · Agile & Scrum · Backlog & Sprints · Release Management · Budget & Scope Control · Distributed Teams · UI/UX & Product Design · AI-Augmented Delivery · Stakeholder & Board Reporting · Product Analytics & KPIs

EDUCATION

AP Degree, Design & Technology
UCN, University College of Northern Denmark

Art History
Aarhus University

Studentereksamen, Language Line
Århus Akademi, Denmark

Exchange Student
Highland High School, California, USA

Hello, I'm Christian

From wireframe to launch, on time.

Over 15+ years I've owned roadmaps and backlogs, run Scrum with distributed engineering teams, designed the UI/UX myself, and built AI into the way teams ship. Two platforms taken from zero to one, one of them to 175,000+ users. Most recently I designed, built and launched Torito, now on the App Store.

175K+	15+	~95%	15
Platform users	Years in digital products	Releases on schedule	Engineers led, remote

Selected work

Torito

Consumer app · Built & launched by me — Oct 2026

Torito shows today's gas price at every station in Mexico, over 12,700 of them, plus EV chargers, on a list and a map. I came up with the idea, designed it and built it myself with Lovable and Claude, from the price data pipeline to the UI, and published it on the App Store in October 2026. Free on iPhone and on the web.

12.7K stations, updated daily · **CNE** official price data · toritoapp.com · App Store

Experience

Product & Delivery Lead

Ganax · Mexico City — 2023 – Present

An AI-powered influencer marketing platform connecting consumer brands with creators through results-based campaigns. I own product and delivery end to end and lead a ~10-person team, including 8 Vietnam-based engineers.

PRODUCT OWNERSHIP & STRATEGY

- Took the platform from zero to one, designing the full UI/UX and shipping an **MVP in 3 months** and a full product in 6.
- Prioritize the roadmap with the CEO, turning business needs into design documentation, specs and user stories scoped with the lead architect.
- Onboarded **~30 brands** with campaign budgets of USD 50K–100K each during an invite-only launch, with a growing waitlist.

AGILE DELIVERY & RELEASE MANAGEMENT

- Run bi-weekly Scrum: **30+ sprints** shipped with **~95% of releases on schedule**, every release within budget.
- Keep the Jira backlog groomed, clear blockers and surface scope creep early; demo and QA every feature before release.

TEAM, INTEGRATIONS & AI

- Hired ~10 team members, including 8 engineers, and replaced spoken standups with written async updates across 13 time zones.
- Delivered Stripe payments and social media API integrations; added an AI chatbot and AI agents for testing and code review.
- Report delivery progress, roadmap and budget directly to co-founders, the board and investors.

TOOLKIT

Product & delivery
Product ownership, roadmapping, backlog management, sprint planning, user stories, release management

Agile & collaboration
Scrum, Jira, Slack, remote team management, technical documentation, scope & budget control

Design & prototyping
Figma, Sketch, Framer, Adobe Creative Suite, InDesign, Photoshop, wireframing, UI/UX

AI tools & workflows
Claude, Lovable, Higgsfield, ElevenLabs, Midjourney, AI agents for testing & code review, AI chatbots, AI-assisted prototyping

Platforms & integrations
AWS, Google Cloud, Stripe, social media APIs, WordPress, CMS platforms

Product analytics
Funnel analysis, adoption & retention metrics, campaign performance, SEO

LANGUAGES

Danish (native) · English (fluent)
Swedish, Norwegian, German (working knowledge)

RECOGNITION

Norrsken Impact 100
CanopyLAB was the only Danish company among the 36 European startups on Norrsken's list of the world's most promising impact startups

VOLUNTEER

Contributing Writer
RÆSON, independent Danish magazine

Co-Facilitator
EU-funded week-long youth training program

— Experience, continued

Co-Founder
CanopyLAB · Copenhagen, Denmark · advisory today
2011 – 2024

An AI-powered social learning platform for corporate training, plus a free learning community with courses from 30+ NGOs. I owned product design and delivery, created all UI/UX and product documentation, and hired and managed the Vietnam-based development team.

PRODUCT GROWTH & DISCOVERY

- Grew the platform from 0 to **100,000+ users in five years** and to **~175,000** today, through word of mouth, conference talks and SEO rather than paid ads.
- Served **hundreds of clients**, including universities, Deloitte and Danish small and mid-sized companies.
- Shipped **15–20 major releases**, iterating on usage data and client and user interviews.

AI PERSONALIZATION & TEAM

- Built proprietary personalization algorithms **before LLMs went mainstream**, tailoring every course to each learner's preferred style.
- Trained the dataset in-house by answering questions thousands of times by hand, a project the team called "training your dragon."
- Hired the entire development team, scaling it to **15 people** in a Vietnam-based model later carried over to Ganax.
- Managed a **~USD 500K annual technology budget** and reported progress, risk and outcomes to the C-suite, board and investors.

Owner, Independent Design Practice
C/S/J/J · Denmark & Australia
2011 – 2016

- Ran a one-person studio for ~10 Danish and international clients, retaining several for all five years.
- Led graphic design, marketing and magazine production for **Pixelz**, a 2,000-employee company later acquired for a nine-figure DKK sum.
- Delivered web design, desktop publishing and brand materials from concept through final production.

Graphic Designer
Albatros Travel · Copenhagen
2012 – 2014

- Led marketing design for the Danish and German markets, producing all newspaper advertising and ongoing ad assignments.
- Created the first wireframes and designed the UI/UX for the company's mobile app.

Earlier
Brightside (agency) · Jysk Rejsebureau · NS System
1998 – 2012

Design internship at a full-service advertising agency, long-haul travel consulting, and my first design job in prepress.
